Second  
Section

Just like Windows XP, Windows 7, Windows 10, and Mac OS X, Linux is an operating system. An operating system is software that manages all of the hardware resources associated with your desktop or laptop. To put it simply the operating system manages the communication between your software and your hardware. Without the operating system (often referred to as the OS), the software wouldnt function.

\$ echo

### Second Section

Linus Benedict Torvalds (born December 28, 1969) is a FinnishAmerican software engineer who is the creator, and historically, the principal developer of the Linux kernel, which became the kernel for many Linux distributions and operating systems such as Android and Chrome OS. He also created the distributed version control system Git and the diving logging and planning software Subsurface. He was honored, along with Shinya Yamanaka, with the 2012 Millennium Technology Prize by the Technology Academy Finland "in recognition of his creation of a new open source operating system for computers leading to the widely used Linux kernel". He is also the recipient of the 2014 IEEE Computer Society Computer Pioneer Award and the 2018 IEEE Masaru Ibuka Consumer Electronics Award.

How To Install

Command  
Line

\$ echo

Second  
Section

A Linux distribution (often abbreviated as distro) is an operating system made from a software collection, which is based upon the Linux kernel and, often, a package management system. Linux users usually obtain their operating system by downloading one of the Linux distributions, which are available for a wide variety of systems ranging from embedded devices (for example, OpenWrt) and personal computers (for example, Linux Mint) to powerful supercomputers (for example, Rocks Cluster Distribution).

- RedHat
- Debian
- Arch Linux
- openSUSE
- Ubuntu
- ...

## metacharacters and Control operators

Also there are characters with special meaning. You need to escape them if you need them in your commands:

| & ; ( ) < > \*

There is also control operators. They also have special meanings:

|| && & ; ;; | ( )

The most important ones are ; (do one by one), && (logical and) and || (logical or).
